Projects

Website Portfolio
project link: https://maheshpaul.netlify.app/
- Created a visually appealing online portfolio using **ReactJS** for a dynamic and interactive experience.
- Utilized **Sanity** for a user-friendly content management system, allowing for easy updates to showcase my skills and projects.
- Leveraged **Netlify** for seamless deployment, ensuring my portfolio is readily accessible to potential employers and collaborators.

Manga Scraper
project link: https://github.com/CityIsBetter/Manga-Scraper/
- Developed a **Python** script for efficiently downloading manga chapters. It fetches individual pages, converts them to **JPG format**, and saves them locally for offline reading.
- Leverages **web scraping** techniques to automate the download process, saving users time and effort.
- Enhances manga reading experience by creating a readily **accessible** collection of downloaded chapters.

AcademiaHUB
Project link: https://github.com/CityIsBetter/AcademiaHUB
- Built AcademiaHUB, a web app to help students juggle their busy schedules. It tracks attendance, sets reminders, and calculates CGPA - all in one place! (**React JS + Firebase**)
- Seamless **Google account integration** allows students to access AcademiaHUB anywhere, anytime, ensuring they never miss a deadline.
- Empowers students to manage their time effectively and focus on academic success through features promoting organization and **goal tracking**.
